

Elite *iQ*[™]

**PERSONALIZED
HAIR REMOVAL**
BECAUSE EVERYONE
IS DIFFERENT

WHAT IS ELITE IQ?

Did you know the average woman will spend 72 days of her life shaving her legs?¹ Traditional hair removal methods such as shaving, waxing and tweezing can be time consuming and expensive.

Now we can offer you a permanent hair reduction solution with the Elite iQ device that will allow you to prioritize the important things in life.

Think of what you could do with an extra 72 days!

HOW DOES IT WORK?

The Elite iQ device offers quick, easy and personalized laser hair treatments using smart technology. The Elite iQ device is equipped with the Skintel[®] device, the only FDA melanin reader on the market.

Skintel device is technology that reads your precise skin type, so it can be used to safely treat all skin types and areas of the body including under arms, legs, bikini area and back - making the Elite iQ device the perfect hair removal solution for men and women.

IS THIS TREATMENT RIGHT FOR ME?

The Elite iQ device can be safely used on all skin types and anywhere on the body including face, back, chest, arms, underarms, bikini area and legs.

Talk with your provider to discuss if you are a candidate for Elite iQ treatments.

WHEN WILL I SEE RESULTS?

You can expect to see a gradual decrease in hair thickness and the amount of hair in the area treated.* Since hair removal treatments only targets hair in the active phase of growth, multiple treatments are often needed for complete removal. Speak to your provider for a consultation to discuss treatment areas and number of treatments required.

ANAGEN PHASE

- Active phase of hair growth.
- Lasts for several months.
- Best phase for laser hair removal.

CATAGEN PHASE

- During this brief phase, the hair bulb regresses and begins to shrink.

TELOGEN PHASE

- Resting phase of hair growth.
- Lasts a few months then hair is released.
- Anagen phase begins again.

HOW MANY TREATMENTS WILL I NEED?

The amount of treatments and treatment times may vary, depending on the size of the area, but typically take less than 30 minutes!
